DETAILED ACTION

1. This office action is in response to application 10/758,178 filed on January 16, 2004.

Election/Restrictions

2. This application contains claims directed to the following patentably distinct species:

Species I (figures 4, 5, 6, 45, 64, 65)

Species II (figure 7, 8, 40, 41, 42, 44)

Species III (figure 9, 10, 11, 51, 52)

Species IV (figures 12, 13, 36)

Species V (figures 14, 15, 16, 17, 68)

Species VI (figures 18, 19, 69)

Species VII (figures 20, 35)

Species VIII (figures 21, 22, 37, 38, 39)

Species IX (figure 23)

Species X (figures 24, 25, 26, 46, 47, 48, 49, 50)

Species XI (figures 27, 53, 54, 55, 56)

Species XII (figures 28, 58, 59)

Species XIII (figure 29)

Species XIV (figures 30, 60, 61, 62, 63)

Species XV (figures 31, 32, 66, 67)

Species XVI (figure 33)

Species XVII (figure 34)

Figures 1-3, 43, and 57 are generic.

The species are independent or distinct because claims to the different species recite the mutually exclusive characteristics of such species. In addition, these species are not obvious variants of each other based on the current record.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims are generic.

There is an examination and search burden for these patentably distinct species due to their mutually exclusive characteristics. The species require a different field of search (e.g., searching different classes/subclasses or electronic resources, or employing different search queries); and/or the prior art applicable to one species would not likely be applicable to another species; and/or the species are likely to raise different non-prior art issues under 35 U.S.C. 101 and/or 35 U.S.C. 112, first paragraph.

Applicant is advised that a reply to this requirement must include an (i) an elections of the species to be examined even though the requirement may be traversed (37 CFR 1.143) **and (ii) identification of the claims encompassing the elected species**, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

The election of species may be made with or without traverse. To preserve the right to petition, the election must be made with traverse. If the reply does not distinctly

Art Unit: 2622

and specifically point out supposed errors in the election of species requirement, the election shall be treated as an election without traverse. Traversal must be presented at the time of election in order to be considered timely. Failure to timely traverse the requirement will result in the loss of right to petition under 37 CFR 1.144. If claims are added after the elections, applicant must indicate which of these claims are readable on the elected species.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the species unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other species.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species.
